

# JOSHGHUN BABAYEV

---

## Software Engineer

Baku, Azerbaijan | +994-55-693-2631 | joshghunbabayev@gmail.com

### CAREER SUMMARY:

---

Versatile Software Engineer and Programming Instructor experienced in backend and frontend development with Golang, Node.js, Python, and modern web technologies. Skilled in designing scalable business applications, REST APIs, and low-code/no-code solutions on Microsoft Power Platform and Azure. Experienced Freelance Developer delivering custom web applications for internal management, sales, and warehouse systems. Also proficient in graphic design, creating logos, certificates, and branding assets with Adobe tools, ensuring consistent visual identity.

### WORK EXPERIENCE:

---

#### LV Logistics – Caspian

Systems Developer | Feb 2025 – Present

- Designed, developed, and deployed business applications using Microsoft Power Apps, Power Automate, and Power Platform.
- Built scalable solutions on Microsoft Azure integrating with SharePoint and Outlook services.
- Delivered low-code and no-code solutions to optimize workflows and reduce manual operations.
- Implemented secure and efficient REST APIs using Node.js/Express.js and Go/Gin.
- Collaborated with cross-functional teams to automate processes and improve system performance.
- Utilized Git/GitHub for version control.

#### Freelance | No Company

Software Engineer | Nov 2023 – Present

- Designed and developed custom web applications for business needs, including warehouse, sales, and internal management systems.
- Built end-to-end solutions using modern backend technologies such as Node.js, Go/Gin, and Python.
- Developed responsive, user-friendly web interfaces using HTML, CSS, JavaScript, and modern frontend practices.
- Implemented secure API integrations and database structures to support scalable business operations.
- Delivered tailor-made software solutions aligned with client requirements, improving workflow efficiency and automation.
- Managed full project lifecycle from requirements gathering to deployment, maintenance, and technical support.
- Collaborated directly with clients to translate business processes into functional system features.

Programming Teacher | Dec 2023 – Aug 2025

- Taught backend development using Python and Node.js, covering APIs, server-side logic, and database integration.
- Delivered practical lessons on frontend fundamentals including HTML, CSS, and JavaScript.
- Guided students through building real-world mini-projects and hands-on coding exercises.
- Explained software development concepts such as Git version control, debugging, and best practices.
- Provided structured learning paths to help students progress from fundamentals to application-level development.
- Supported students individually by reviewing code, answering technical questions, and giving feedback on assignments.

Graphic Designer | May 2022 – May 2024

- Designed certificates, logos, and various brand assets for clients.
- Created clean and scalable visuals optimized for digital and print use.
- Delivered design concepts and revisions based on client requirements.
- Ensured consistent branding across all produced materials.

#### The Galactic Society | Non-profit Organization

Graphic Designer | Department Chairman | Oct 2023 – May 2024

- Designed certificates, logos, and visual assets for programs and events.
- Ensured consistent branding across all materials.
- Led the department, coordinating design projects and reviewing outputs.

### EDUCATION:

---
